

## SIGMA SPORT® PRESS RELEASE

Please publish. Thank you for sending us document copies and hyperlinks.

Neustadt a. d. Weinstraße, 14/03/2016

### **BUSTER 100 – a small but impressive power light**

The well-known BUSTER series is growing: building off of the successful BUSTER 200 and BUSTER 600 models, SIGMA SPORT is now launching its smallest and most lightweight power light, the BUSTER 100. With a light output of 120 lumens and a beam range of 35 meters, the BUSTER 100 offers optimum illumination and is ideal for use both in cities and when off-roading in the dark. With its slender housing and weighing only 62 grams, you'll barely even notice the BUSTER 100 on your handlebars. At an RRP of just €24.95, SIGMA SPORT's new front light further impresses with its unbeatable value for money.

The BUSTER 100 is the only SIGMA power light to have a permanently illuminated operating button, which can be quickly and easily found in the dark. All lights in the BUSTER series feature the same six modes. Three solid light modes of power (120 lumens), standard (60 lumens) and eco (30 lumens) are accompanied by the BUSTER 100's three flashing modes: normal, fast, and 'SOS'.

Depending on the mode, the batteries last up to 10 hours. The BUSTER 100 can be fully recharged within two hours using the micro USB cable provided. Plus, the power button also functions as a current battery status indicator and a charge status indicator.

So small and light yet so powerful! Premium-quality materials make the BUSTER 100 robust and weatherproof. The micro USB charging port is protected against dust and dirt by a silicone plug, which is easy to open and re-seal.

Barely larger than a matchbox, the BUSTER 100 fits into any pants pocket and is the ideal everyday companion. With 120 lumens, it is also a versatile pocket torch.
