

Can I use any microSD card with my ROX 12.0?

In general, every microSD card is compatible with the ROX 12.0. Since there are great differences in quality, some microSD cards can cause problems. We have created a list of microSD cards that we have tested.

IMPORTANT: To ensure the proper functioning of the microSD card, it **must** first be formatted as **FAT32** (NTFS or exFAT is not recognised by the ROX12)! 128 GB memory cards **must** be formatted with the **cluster size 64 KB!**

When using „slow“ memory cards and memory cards larger than 32 GB, the starting time of the ROX 12.0 is extended!

- AGFA microSDHC 4 GB
- Kingston microSDHC 8 GB, Class 4
- Lxsino 32GB 32G Ultra microSDHC, Class 10
- Samsung EVO Plus microSDHC 32 GB, up to 95 MB/s, Class 10 U1 memory card
- Samsung EVO SDHC 32 GB, Class 10 U1
- SanDisk Ultra 16 GB microSDHC memory card, Class 10 U1, A1, FFP
- SanDisk Ultra 32 GB microSDHC, Class 10 U1, A1
- SanDisk Ultra 64 GB microSDHC, Class 10 U1, A1
- SanDisk Ultra 128 GB microSDHC, Class 10 U1, A1
- Transcend TS16GUSDCU1, Class 10 Premium microSDHC 16 GB memory card UHS-I
- Transcend, Class 10 Premium microSDHC 32 GB memory card UHS-I
- TPSON 32 GB microSD card, microSDHC memory card, Class 10 UHS-I
- Verbatim 8Gb Adapter, Class 10

PS: We will test more cards and add them to the list!
